# STAT-MD Training Workshop

Early identification of ASD for pediatric health care providers

Friday, September, 25, 2015  
9 a.m. to 5 p.m.

## Workshop Purpose

STAT-MD Training teaches enhanced diagnostic consultation and screening procedures to pediatric medical providers serving young children. This 1-day workshop provides training in conducting autism-focused assessments with children, ages 18 to 36 months. Emphasis is on incorporating time-sensitive consultation models into community practice. Training components include:

- Performing interactive screening with the Screening Tool for Autism in Toddlers and Young Children (STAT)
- Conducting developmentally sensitive caregiver interviews
- Formulating diagnostic impressions and communicating them to caregivers
- Identifying appropriate billing and coding procedures
